**Peterboro's Quality Guarantee**

As an extra step in our quality control procedures, Peterboro matboard components are regularly sent to independent pulp and paper testing laboratories for analysis. This ensures compliance with FACTS, Fine Art Trade Guild and PPFA matboard standards.

**Fine Art Trade Guild (FATG)**

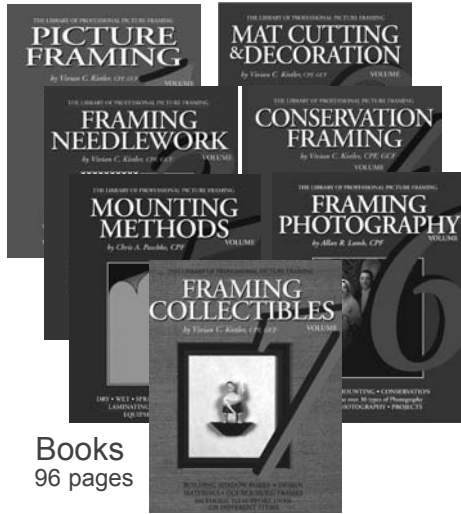

The Fine Art Trade Guild Mountboard Standards Development Group comprises mountboard manufacturers, distributors and users from across the world, including conservators, who are committed to achieving consensus and compliance for minimum standards of mountboards appropriate for clearly defined levels of framing. The Guild thus provides clear communication to framers and helps them educate consumers on the various quality levels available to protect artwork.

**The Fine Art Care & Treatment Standards**

FACTS was established in 1994 and evolved from the ever-increasing need for information about the preservation of artwork and keepsakes. FACTS standards address their subject with the most current scientific research and the widest possible participation. Peterboro Conservation meets and in many cases exceeds the FACTS guide for Performance in Mat and Mounting Boards. The standards are reviewed regularly to include new research and are recognized by the Professional Picture Framers Association (PPFA).
